DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn to a backrest, classified in class 297, subclass 452.56.
- II. Claims 4-9, drawn to method of making the backrest, classified in class 156, subclass 245 and class 29, subclass 91.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the backrest. With a web attached to the frame, such as the present invention, can be made by stretching a web across the frame, the web having an engagement piece that is insertable into a groove of the frame by pressing and binding as well as by using fasteners such a bolts to attach frame sections together with the web sandwiched between the frame sections.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Because these inventions are distinct

Art Unit: 3636

for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Charles E. Baxley on August 12, 2004, to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
